Cross-cloud CI Intro

KubeCon

CloudNativeCon

North America 2018

Why? The CNCF ecosystem is large, diverse and continues to grow. CNCF would like to ensure cross-project interoperability and cross-cloud deployments of all cloud native technologies and show the daily status of builds and deployments on a status dashboard.

Cross-cloud CI Intro

KubeCon

CloudNativeCon

North America 2018

What? The Cross-cloud CI project consists of a cross-cloud testing system, status repository server and a dashboard.

The cross-cloud testing system has 3 components (build, cross-cloud, cross-project) that continually **validate the interoperability of each CNCF project for any commit on stable and head across all supported cloud providers.**

The cross-cloud testing system can reuse existing artifacts from a project's preferred CI system or generate new build artifacts. The status repository server collects the test results and the dashboard displays them.

Goal: to target CNCF projects

CNCF CI Platform Timeline

**CLOUD NATIVE
COMPUTING FOUNDATION**

- Feb 28, 2017: CI Platform started
- Jan 26, 2018: v.1.0.0 Dashboard released
- Mar 20, 2018: v1.2.0 included ONAP
- Sept 7, 2018: v1.5.0 included Envoy
- Oct 31, 2018: v1.6.0 included OCI

Quick Intro to CNCF Cross-cloud CI (cncf.ci)

CI Status Dashboard Overview

KubeCon

CloudNativeCon

North America 2018

CI Dashboard Overview:

- Overview of cncf.ci
 - Shows status of 3 pipeline stages: Build, Provision and App Deployments
 - Refreshes at 3:00am Eastern Time every day
 - Supports dynamically adding/removing active clouds and projects
 - Clicking on Build status badge opens CI system build job URL
 - Clicking on Release Name opens project's GitHub commit URL
 - Clicking on Deployment status badge opens “provisioning/app-deploy” job URL

1. Build projects from source

Build Pipeline Stage

KubeCon

CloudNativeCon

North America 2018

1. **Build:** Compile binaries and e2e tests
2. **Package:** Create containers, create artifact pinning config and push to registry
3. **Update-Dashboard:** Update build status badges

2. Provision w/ cross-cloud

Cloud Provisioning Pipeline Stage

KubeCon

CloudNativeCon

North America 2018

1. **Build:** Prepare provisioning software from the cross-cloud project
2. **Artifacts:** Collect K8s artifact pinings from the previous K8s builds
3. **Cross-Cloud:** Deploy K8s onto each cloud using cross-cloud provisioner
4. **Update-Dashboard:** Update deployment badges

🕒 Last updated: 12 hours ago

	✓ SUCCESS	8ad7083	✓ SUCCESS	✓ SUCCESS	✓ SUCCESS	✓ SUCCESS	✓ SUCCESS	✓ SUCCESS	✓ SUCCESS

3. Deploy w/ cross-project

App Deployment Pipeline Stage

1. **Artifacts:** Collect project artifact pinnings from the previous build stages
2. **Cross-Project:** Use Helm charts to deploy each project
3. **End-to-End:** Run e2e tests for each project
4. **Dashboard-Update:** Update deployment status badges
